Zooming and Panning > MouseWheelZoomModifier

MouseWheelZoomModifier

SciChart.js provides an zooming / panning behavior when scrolling the mouse-wheel, or two-finger drag on touch devices via the [MouseWheelZoomModifier type](#) , available out of the box.

Besides common features which are inherited from the [ChartModifierBase](#)  class, the [MouseWheelZoomModifier type](#)  allows you to specify how fast the chart zooms in or out via the [growFactor property](#) .
